

Internet Explorer and Email Basics

- **Course Number:** IE&EB
- **Length:**

Certification Exam

There are no exams currently associated with this course.

Course Overview

This course explains what the Internet really is, how to explore the Internet, how it works, and how you can best use all the available tools. It will also define terms and show you the power of an Internet so huge that most people only experience a fraction of what it has to offer.

Prerequisites

There are currently no prerequisites with this course.

Audience

This course is intended for those who have never logged onto the Internet before, or only tentatively explored the web.
